

In this issue of the *Annals of Family Medicine*

Prescription Opioid Use for Musculoskeletal Conditions and Satisfaction With Care 6

In patients with musculoskeletal conditions, prescription opioid use is associated with greater satisfaction with care.

Integrating Community Health Workers into Medical Homes 14

Integrating community health workers requires champions, innovation, a whole-patient focus, and reimbursement strategies.

Public Health/Primary Care Birth Cohort Testing for Hepatitis 21

A combined public health/primary care birth cohort strategy to test for hepatitis has high test uptake but does not detect hidden chronic hepatitis C infections.

Family Physicians in South Africa's District Health System 28

In South Africa, health system performance and clinical care score higher in hospitals with family physicians but lower in community health centers with family physicians.

Communications With People Newly Diagnosed With Diabetes 37

Communication with people newly diagnosed with diabetes can be improved by addressing structural and procedural barriers, including patient-centered concerns.

Family Physicians' Experiences Managing Medical Requests From Family and Friends 45

Physicians use a complex decision-making process when confronted with medical requests from nonpatients.

Features of Terra Firma-Forme Dermatositis 52

Recognition of this benign skin condition can help avoid anxiety and unnecessary biopsies.

Predictors of Attrition From Family Medicine Board Certification 55

Between 1980 and 2000, more than 5% of family physicians did not attempt recertification, with a slight increase among the most recent cohort.

Views of Medicine as a Calling and Primary Care Residency Selection 59

Identifying with medicine as a calling may increase the likelihood of pursuing a primary care career.

State Data and Social Complexity Risk Factors for Children 62

State administrative data can be used to identify adverse experiences associated with higher rates of emergency department use in Medicaid-insured children.

Medical Interpreters in Outpatient Practice 70

A language access plan with professional medical interpreters can contribute to better and more efficient patient care.

The Day I Died 77

When a physician has a cardiac arrest while driving, a group of Good Samaritans saves his life.

An Open Letter to My Colleagues in Training 80

A family physician reflects on the opportunities and challenges for young physicians as they connect with their patients and communities.
