

In this issue of the *Annals of Family Medicine*

Primary Care Physicians Continuity, Lower Costs, and Hospitalizations 492

Patients with greater continuity with their primary care physician have lower health care costs and fewer hospitalizations.

The Role of Performance Coaching in Enhancing Tobacco Treatment Rates 498

Performance coaching increases rates of tobacco dependence treatment in a multi-component intervention.

Prenatal Point-of-Care Tobacco Screening and Clinical Relationships 507

Women express both support and concern about use of a urine dipstick to test for prenatal tobacco exposure.

Legacy Drug-Prescribing in Primary Care 515

Legacy prescribing, the unnecessary continuation of drugs, may contribute to inappropriate medication use.

Clinic-Based Patellar Mobilization Therapy for Knee Osteoarthritis 521

Patellar mobilization and exercise can reduce pain and improve function and quality of life in patients with knee osteoarthritis.

Older Adults' Preferences for Discussing Long-Term Life Expectancy 530

When presented with a hypothetical scenario of serious illness, most older adults do not wish to discuss life expectancy.

Factors Associated With Loss of Usual Source of Care Among Older Adults 538

Demographic and health factors are longitudinally associated with loss of a usual source of care in older adults.

Panel Size, Clinician Time in Clinic, and Access to Appointments 546

Clinician time in clinic is associated with longer waits for appointments independent of panel size.

Access to Primary Care for Persons Recently Released From Prison 549

Callers who present as recently released from prison are less likely than controls to be offered an initial primary care physician appointment.

Peripheral Pulse Oximeters Labeled "Not for Medical Use" 552

In patients with oxygen saturation at or above 90%, pulse oximeters approved and not approved for medical use have similar readings.

Primary Care Clinicians' Willingness to Care for Transgender Patients 555

Most primary care clinicians are willing to provide routine care to transgender patients.

Communicating With Patients With Non-Binary Gender Identities 559

This essay illustrates ways to interact respectfully and affirmatively with nonbinary people in the patient care visit.

The Gift of Empanelment in a "Clinic First" Residency 563

A resident gains medical competency and an understanding of the value of primary care in a residency with a longitudinal curriculum.
