

## In this issue of the *Annals of Family Medicine*

### Change in Site of Children's Primary Care 390

*A declining proportion of children attend family medicine practices, particularly in very rural areas.*

### Patient-Physician Agreement in Reporting and Prioritizing Existing Chronic Conditions 396

*When asked to identify a patient's priority conditions, there is only modest agreement between patients and their physicians.*

### Smartphone-Operated Single-Lead ECG to Detect Rhythm and Conduction Abnormalities 403

*A smartphone-operated ECG is highly accurate for detecting dysrhythmias and can be useful when a 12-lead ECG is not available.*

### Assessing Subjective Memory Complaints and Simple Memory Task Scores For Future Dementia Risk 412

*In older adults, a single question on memory complaints is comparable to 2 other cognitive screening tools for assessing risk of dementia.*

### Reducing Time to Referral for Colorectal Cancer Patients in Primary Care 419

*Symptomatic colorectal cancer patients in primary care are at risk for longer time to referral if characteristics of lower cancer suspicion are present.*

### Professional Communication Networks and Job Satisfaction in Primary Care Clinics 428

*Health professionals in the core of a face-to-face communication network have higher job satisfaction than those on the periphery.*

### Positive Outcomes of Case Management for Frequent Users of Health Care 448

*Case selection, high intensity case management, and multidisciplinary teamwork are associated with positive outcomes for frequent users of health care.*

### Interventions Addressing Food Insecurity in Health Care Settings: A Systematic Review 436

*Many health care settings are exploring ways to reduce patient food insecurity, but there is little rigorously conducted research in this area.*

### Addressing Health Disparities Through Voter Engagement 459

*Health organizations can promote nonpartisan voter engagement through registration, mobilization, education, and protection of voters.*

### Why Physician Guidance Matters: A Night of Neuralgia, Meningitis, and WebMD 462

*After diagnosing himself online and receiving little physician guidance, a patient discovers the value of patient-physician collaboration.*
