Summary of preventive activities for **Ms. Test Patient**

Dear Test,

9/12/2015

The following preventive activities are important to help you stay well.

The advice below is based on the information that we have in your record. If any of it is incorrect, please tell me.

I will be pleased to explain in our consultation what the findings and results mean for you.

Dr. Mary Goodheart

When we meet in a few minutes, please ask me about these activities that are **due to performed for you now:**

Influenza (the flu) causes serious illness. We have no record of an influenza immunisation for you. We recommend that you receive the influenza vaccine **today or at your next visit.**

Pneumonia is a serious illness. We have no record of a pneumococcal immunisation for you. We recommend that you receive the pneumococcal vaccine **today or at your next visit.**

Bowel cancer is a common cancer in people over the age of 50. Your last bowel cancer screening test was performed on 17/12/2012. We should arrange another bowel cancer test for you **today or at your next visit.**

Our records show that you are a smoker. Smoking greatly increases your risk of heart disease, a range of cancers and premature death. Please ask me about new methods that can help you to become a non smoker.

Your last cervical (Pap) smear test was on 14/04/2008. We should perform your next smear test **today or at your next visit.**

Your last blood sugar level was 4.6mmol on 08/07/2005. We should measure your blood sugar **today or at your next visit.**

Your last blood pressure reading was 136/70mmHg on 02/01/2009. We should measure your blood pressure again **today or at your next visit.**

Your last cholesterol reading was 4.9mmol/L on 08/07/2006. We should measure your cholesterol again **today or at your next visit.**
