1. Klein RJ, Schoenborn CZ. Age Adjustment using the 2000 Projected US Population. Statistical Notes No. 20. Hyattsville, MD: National Center for Health Statistics; 2001. http://www.cdc.gov/nchs/data/statnt/statnt20.pdf. Accessed March 8, 2010.

^b Although survey questions in the 2007 BRFSS survey were identical to those asked in the 2006 National Health Interview Survey, the latter survey is the official data source for monitoring progress towards the national arthritis management objectives. BRFSS data can be used to monitor progress toward meeting state-specific health objectives for 2010, but these data are not recommended for deriving national estimates.

c Includes only persons with a body mass index of ≥25.0 (calculated as weight in kilograms divided by height in meters squared).

d Confidence interval.
