questions, please contact Cynthia Coulthard:

Please return your completed survey in the envelope provided to the University of Washington, Department of Family Medicine, WWAMI, Rural Health Research Center.

## Who Treats Opioid Use Disorder in Rural America?

Recent WWAMI Rural Health Research Center research has demonstrated the lack of physicians located in rural areas who have a DEA waiver to prescribe buprenorphine as an office-based outpatient treatment for opioid use disorder. More than half of US counties lack even a single provider.

You have been selected to participate because you are one of the rurally-located physicians with a current DEA waiver to prescribe buprenorphine. This project will quantify the availability of office-based buprenorphine treatment for opioid use disorder.

Your answers will remain **COMPLETELY CONFIDENTIAL**. Neither you nor your clinic will be identified when the results of this research study are reported. If you have any questions please feel free to contact Cynthia Coulthard at 206-685-6610 or ccoult@uw.edu.

You can complete this paper survey and return it by mail in the envelope provided or complete it online at: **www.ruralhealthsurvey.org**
