SD: standard deviation; FRID: Fall risk increasing drug; DHI-s: Screening version of Dizziness Handicap Inventory; ref: reference category; NA not applicable.

\* Psychiatric illness: presence of depressive disorder and/or anxiety disorder and/or panic disorder.

Depressive disorder, anxiety disorder and panic disorder were assessed with Patient Health Questionnaire-9,<sup>1,2</sup> Generalized Anxiety Disorder-7,<sup>3</sup> and Patient Health Questionnaire Panic Module<sup>4</sup>. Impaired functional mobility: Timed Up-and-Go score  $\geq 20$  seconds.<sup>5</sup>

Missing values in <sup>a</sup>1%, <sup>b</sup>0.5%, <sup>c</sup>0.5%, <sup>d</sup>2%, <sup>e</sup>9.4% and <sup>f</sup>3.4% of participants.

## **Supplemental Appendix 2**

This appendix presents the results of an additional prediction model introducing dizziness-related impairment as a continuous outcome. The outcome was defined as dizziness-related impairment at 6 months follow-up. Dizziness-related impairment was assessed with the Dizziness Handicap Inventory (DHI).

### **Model development and performance**

Twenty-two candidate predictors were univariate associated with the outcome (see table B of this appendix). Predictors of the final prediction model were age, sex, DHI screening version (DHI-s) score, standing still as provoking factor, looking up as provoking factor, history of cerebrovascular disease,  $\geq 1$  fall in the past year, dizziness frequency, and ethnicity (see table A of this appendix). For linear regression models R-squared is the goodness-of-fit measure. The prediction model demonstrated an  $R^2$  of 39,3% in the development sample and external validation resulted in an  $R^2$  of 36.4%, which is accurate.

**Table A. Prediction model for dizziness-related impairment at 6 months follow-up  
(backwards selection with  $p$  out  $>0.157$ )**

B: regression coefficient; SD: standard deviation; FRID: Fall risk increasing drug; DHI-s: Screening version of Dizziness Handicap Inventory; ref: reference category; NA not applicable.

\* Psychiatric illness: presence of depressive disorder and/or anxiety disorder and/or panic disorder.

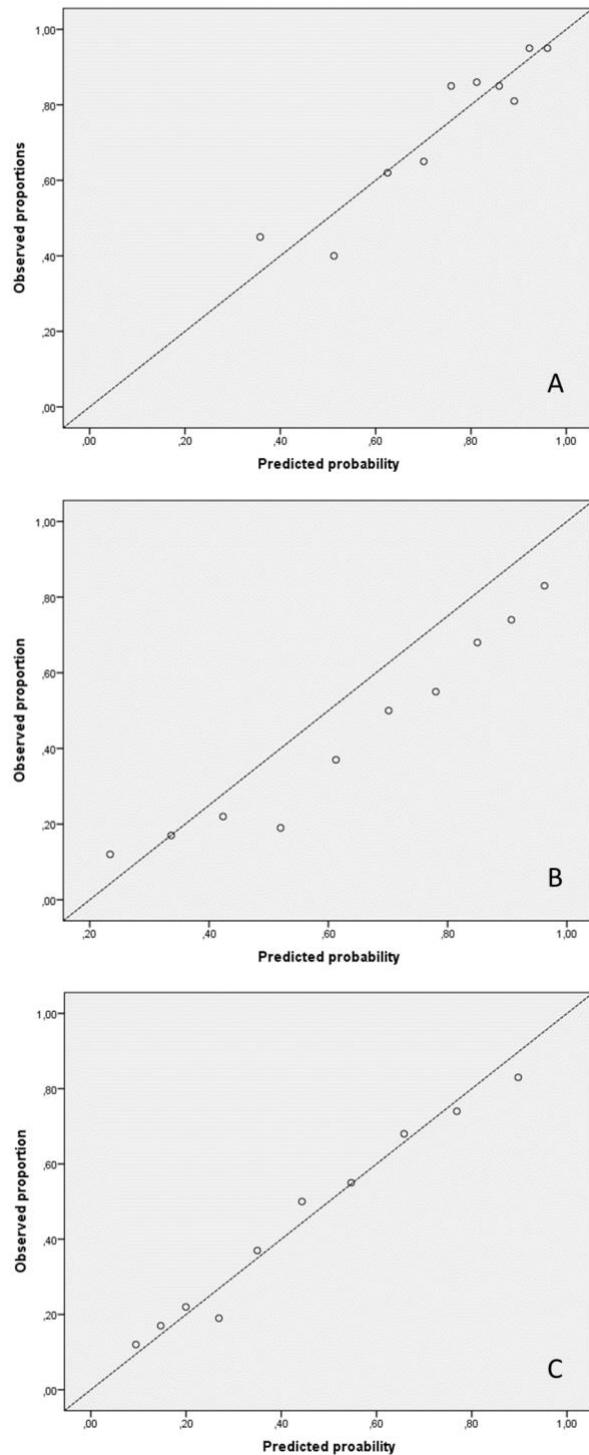

Depressive disorder, anxiety disorder and panic disorder were assessed with Patient Health Questionnaire-9,<sup>1,2</sup> Generalized Anxiety Disorder-7,<sup>3</sup> and Patient Health Questionnaire Panic Module<sup>4</sup>. Impaired functional mobility: Timed Up-and-Go score  $\geq 20$  seconds.<sup>5</sup>

Missing values in <sup>a</sup>1%, <sup>b</sup>0.5%, <sup>c</sup>0.5%, <sup>d</sup>2%, <sup>e</sup>9.4% and <sup>f</sup>3.4% of participants.

**Table B. Univariate association of potential candidate predictors with dizziness-related impairment (continuous outcome) after 6 months.**

### Supplemental Appendix 3

Calibration plots. Diagonal lines indicate perfect calibration. Circles represent observed and predicted rates of an unfavorable course of dizziness in deciles. A. Original model in development cohort (of multiple imputation dataset 1 as example). B. Adjusted model on external validation (of multiple imputation dataset 1 as example). C. Updated model with recalibrated intercept (-1.08) (of multiple imputation dataset 1 as example).

## Supplemental Appendix 4

### Sensitivity, specificity and predictive values at different risk score thresholds in development sample

| Threshold of risk score (percentage of total sample) | TP<br>(n) | TN<br>(n) | FP<br>(n) | FN<br>(n) | Sensitivity<br>(%) | Specificity<br>(%) | PPV<br>(%) | NPV<br>(%) |
|--|-----------|-----------|-----------|-----------|--------------------|--------------------|------------|------------|

NPV: Negative Predictive Value; NA: Not Applicable

## **Supplemental Appendix 5**

### **Dizziness Handicap Inventory – screening version (DHI-s)**

Instructions: The purpose of this scale is to identify difficulties that you may be experiencing because of your dizziness. Please check “yes”, or “no” or “sometimes” to each question. Answer each question only as it pertains to your dizziness problem.

|   | <b>Yes</b> | <b>Sometimes</b> | <b>No</b> |
|---|------------|------------------|-----------|
| Because of your problem, do you restrict your travel for business or recreation?  |            |                  |           |
| Does your problem significantly restrict your participation in social activities, such as going out to dinner, going to the movies, dancing, or going to parties? |            |                  |           |
| Because of your problem, are you afraid to leave your home without having someone accompany you?  |            |                  |           |
| Because of your problem have you been embarrassed in front of others?   |            |                  |           |
| Does walking down a sidewalk increase your problem?   |            |                  |           |
| Because of your problem, is it difficult for you to concentrate   |            |                  |           |
| Because of your problem, is it difficult for you to walk around your house in the dark?   |            |                  |           |
| Because of your problem, are you depressed?   |            |                  |           |
| Does your problem interfere with your job or household responsibilities?  |            |                  |           |
| Does bending over increase your problem?  |            |                  |           |
